EXECUTIVE SUMMARY

MCA graduate with skills in Python, SQL, and Power BI, and foundational knowledge of web technologies including HTML, CSS, JavaScript, and Django. Experienced in developing analytical dashboards and web applications through academic projects and research work. Passionate about building efficient, user-centric solutions by combining data analytics, backend logic, and modern front-end design.

TECHNICAL SKILLS

- **PROGRAMMING & SCRIPTING:** Python, JavaScript
- **Web Technologies:** HTML5, CSS3
- **FRAMEWORK:** Django, Rest API, Fast API
- **DATABASE:** ORACLE, MYSQL
- **Data Analytics:** Excel, Power BI, Data Visualization, Data Cleaning
- **VERSION CONTROL:** Git, GitHub

ACADEMIC QUALIFICATIONS

- **Master of Computer Applications (MCA)** – K.S.R College of Engineering (Autonomous), Tiruchengode (2023–2025), **CGPA: 8.86**
- **Bachelor of Computer Applications (BCA)** – K.S.Rangasamy College of Arts and Science (Autonomous), Tiruchengode (2020–2023), **CGPA: 7.75**
- **Higher Secondary Certificate (HSC)** – Government Boys Higher Secondary School, Sankari, **77% (2020)**
- **Secondary School Leaving Certificate (SSLC)** – Government Boys Higher Secondary School, Sankari, **76% (2018)**

PROJECT

Accurate Prediction of Pest Information Patterns in Crops

- Built a **real-time pest detection system** using **SVM & Decision Tree**, achieving **98% accuracy**
- Developed an **image-based pest identification dashboard**
- Integrated **Twilio SMS alerts** to notify farmers of severe infestations

Face Recognition-Based Attendance System

- Developed a **web-based attendance system** using HTML, CSS, JavaScript, Python, and SQLite
- Implemented **facial recognition** for automated attendance
- Optimized **front-end design, backend integration, and database management** for real-time accuracy

Food Ordering Web Application

- Developed a web application using HTML, CSS, Python, and Django.
- Implemented backend logic with Django and stored data using SQLite.
- Designed responsive UI for displaying food items.

Sales Project Dashboard – Power BI

- Created an interactive Sales Dashboard to track Total Sales, Profit, Cost, and Orders
- Designed KPIs and visuals to analyze Profit Margin %, Yearly & Monthly Sales Trends, and Category-wise Performance
- Used Power Query for data cleaning and DAX measures for advanced calculations
- Provided Customer-level and Manager-level insights for better business decisions

INTERNSHIPS

- **Web Development (Shalom Web Solutions)** – 2-week offline internship, built **web applications using HTML, CSS**
- **Data Annotation (Inouora Technologies)** – 3-month internship, handled **data labelling and preprocessing for ML**

CERTIFICATIONS

- Python & MySQL (Great Learning)
- Python full stack with data analytics (PySpider)

ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES

- Presented a paper at the International Conference, March 2023, Shrimati Indira Gandhi College, Tiruchirappalli
- Served as Department Trustee, coordinated an international-level symposium
- Member, Board of Study, Computer Application Department, contributed to curriculum development
- Volunteer, National Service Scheme (NSS)
